

Web Developer – £55,000 to £65,000 + Benefits – Home-based

The Role

Black Pear Software Ltd is seeking a talented and highly driven Web Developer to join the Black Pear team to deliver our next generation digital care planning products. The products you will be helping to deliver and operate will support the health and wellbeing of millions of people every day.

Working with our established, highly skilled team, developing and enhancing products for new and existing customers, the responsibilities of the Web Developer include:

- Working on single page applications that communicate with our APIs and use components written by other team members.
- Creating component libraries & utilities for use in front end applications.
- Designing UIs that deliver new functionality and solve problems for users.
- Collaborating with other team members to integrate components and services.
- Working closely alongside your manager to support and contribute to product development.

The Company

Black Pear is a leading UK medical technology company developing innovative and proven applications that reshape what is possible for clinicians and patients through integrated shared care. We pride ourselves on our mentality to do things the right way and not necessarily the easy way, and are held in high regard by our clients who share our desire to deliver better healthcare for clinicians and patients.

The Benefits

- Competitive salary + pension scheme
- 25 days annual leave + bank holidays
- Private Medical Insurance offered for you and your family
- Flexible working: home working as standard with occasional travel to attend meetings
- Business hours Monday – Friday, with flexibility
- Option to work a 4 day week (pro-rata)
- Opportunity to learn at your own pace in areas that interest you and that are relevant to the team
- Team meetings are held regularly (both online and face to face) to share ideas and socialise
- Annual Pearfest - our annual music festival held at our HQ

You will be a key appointment with the opportunity to make a significant contribution to the development of our products and for progression within a fast-growing company for the right individual, joining a growing team with a strong culture of enthusiasm and high achievement.

The Person

We are looking for passionate people who love working as part of a team. You will have a proactive, can-do attitude and enjoy contributing towards an adaptive, fun and creative environment.

You will be capable of working cross functionally, facilitating and collaborating with multiple stakeholder groups.

You will be a lifelong learner with the desire to be part of a team that learns, innovates and pushes the boundaries as we strive to become a high-performing, self-organising engineering team.

If you have an interest or experience in health and care it would be an advantage, but isn't essential.

Technical Skills

The key skills and qualities required for the Web Developer role include:

- A strong core understanding of HTML, Javascript/Typescript and SCSS/CSS.
- Experience with a modern Javascript/Typescript front end framework.
- Ability to work independently.

Skills that are desired but not essential include:

- Experience with test driven development.
- Experience with AngularJS and/or Angular.
- An understanding of the principles of good UX design.
- Experience using UX/UI using Sketch/Figma/Adobe XD or similar to wireframe, prototype and design web applications & components.
- A positive and self-confident attitude, with proven communication and team-working skills.
- Experience working with Agile methodologies.
- Experience with npm & NodeJS.
- Experience authoring & maintaining an interface design standard/system.

If you are keen on joining this exciting, forward thinking company and taking the next step in your career, then please contact us to find out more.
